

TRACTOR / TRAILER SEMI SCALE SYSTEM

ALL AIR SUSPENSION

G-103

SYSTEM INCLUDES:

- (1) M32 V320 METER
- (2) Cxx ORANGE CABLES
- (2) L40 VSL AIR SENSORS - SINGLE PORT
- (2) 49-10116-001 RIDE HEIGHT CONTROL VALVES (OPTIONAL)

NOTE: Narrow bandwidth and quick response ride height control valves are included to optimize accuracy.

The Vulcan all-digital air scale system for tractor / trailer combinations provides an accurate way to obtain axle and/or payload weights. Corrosion resistant, stainless steel air sensors provide a rugged and reliable solution well suited to meet the requirements of on-board trucking applications. Air sensors are altitude and temperature compensated to enhance performance and accuracy. Vulcan VSL electronics allow unlimited mixing of tractors and trailers without any adjustments.

NOTE: Not suitable for all truck air suspensions. Please contact factory for details.
